# HIRING & VETTING STAFF

## HIRING & VETTING STAFF

Experienced and honest people ensure delivery of quality services and we have an effective screening process to hire our employees. We follow BS 7858 guidelines and ensure that all employees are fully vetted before offering an employment. We collect all relevant information from the applicant to complete thorough checks and this include applicant checkable work and education history. After completing all checks and screening process, vetting is completed and Approval of Company Director is needed before the vetting is signed off. We maintain employee's personal files with all necessary documents and have designed a Vetting Matrix which is followed by our designated official to monitor expiry dates and conditions of employment and this provides us plenty of time to find and chase new licenses / any other documents. 5GS Security Services complies with BS 7858 to complete its vetting & screening process.
